

Saad Ali
Composer & sound designer for visual media
<http://www.rs-launchpad.net>

I have over 10 years of composition and production experience and have worked on a wide range of commercial projects.

I produce a variety of composition styles ranging from orchestral, ambient, symphonic, grand piano driven instrumentals to rock, pop, jazz, whimsical symphonies and electronic music. I have worked on short films, animated shorts, video game scores, podcast music and music for stage productions.

I have uploaded most of my work (as per client approval) **on my own website, as a web portfolio for your consideration.** Please feel free to browse through it here -

[Reckoning Storm Audioworks](http://www.rs-launchpad.net)

Feel free to contact me to discuss music and sound design for your project. I am modest with rates & try to be very quick on development timelines.

When all is said and done, I'm as easy to work with as humanly possible, maintaining a long list of happy clients and would be more than willing to provide you with references upon request.
